## WE EMBRACE OUR RESPONSIBILITY TO HELP SOLVE THE CLIMATE CHANGE SAID OBAMA

### PRESIDENT GLACIER CONFERENCE ANCHORAGE

Paris, Washington DC, Anchorage, 03.09.2015, 00:54 Time

**USPA NEWS** - "It is wonderful to be here in the great state of Alaska. I've come here today as the leader of the largest economy, second largest emitter to say that United States recognise that this our role in creating this.Said President Obama at the GLACIER Conference in Anchorage, Alaska on Monday evening.

PRESIDENT OBMA TRAVELED TO ALASKA AND ADDRESSED A TALK ABOUT CLIMATE CHANGE AND SAID "IT IS A SOLVABLE PROBLEM"[1]

President Obama is traveling in Alaska to shine a spotlight on what Alaskans in particular have come to know: Climate change is one of the biggest threats we face, it is being driven by human activity, and it is disrupting Americans' lives right now. "It is wonderful to be here in the great state of Alaska. I've come here today as the leader of the largest economy, second largest emitter to say that United States recognise that this our role in creating this. And we embrace our responsibility to help solve it. And I believe we can solve it. That's the good news, even if we cannot reverse the damage that we already caused, we have the means the scientific of imagination, and technological innovation to avoid a reprovable harm.

We know that human activity changed the climate. That is beyond dispute.[2]

Everything else is politics. If people are denying the facts of climate change and we can have a legitimate debate to find how we're going to address this problem, we can not deny science. More draught, more floods, raising sea levels, greater migration, more refugees, more scarcely, more conflicts, that's one path we can take ! The other path is to embrace the human engineering to do something about it. This is within our power, this is a solvable problem if we start NOW. Said President Obama speaking at the GLACIER Conference in Anchorage, Alaska on Monday evening, where he emphasised the importance of recognising climate change and taking steps to combat it globally.

President Obama stressed on those who deny climate change cannot deny the scientific facts. He urged to act and be in motion to "solve the problem"[3] if we "start now"[4]. The deniers targeted are certainly meaning the economical actors and industrial leaders together with Congress political accomplices and lobbyistes that are far from reality overtaken by natural disasters more frequent and severe.

PRESIDENT OBAMA SAID WE ARE NOT MOVING FAST ENOUGH ON CLIMATE CHANGE[5]

"Climate change is no longer some far-off problem; it is happening here, it is happening now,"[6] the President Obama said in Anchorage, Alaska, addressing an international conference on the Arctic.[7]

Four times in a 24-minute speech he warned "we're not moving fast enough,"[8] noting that "none of the nations represented here are moving fast enough."[9]

He hopes to change that fact on a three-day swing through the state, using the "God-given majesty of this place"[10]"and the dramatic fire, erosion, and melting it faces as the planet warms"[11]to drive support for a radical reduction of heat-trapping emissions. -----President Barack Obama asked for rallying world leaders to reach an agreement this year or "condemn our children to a world they will no longer have the capacity to repair"[12].

"If we do nothing to keep glaciers from melting, and forests from burning we will condemn our children to a planet beyond their repair,"[13] the president said, quoting images of "entire industries of people who can't practice livelihoods, desperate refugees, political disruptions that could trigger conflicts around the world."[14]-----"Any leader willing to take a gamble on a future like that,"[15] he continued, "any so-called leader who doesn't take this issue seriously or treats it like a joke is not fit to lead. On this issue, of all issues, there's such a thing as being too late."[16]continues President Obama.

The tone of Obama's speech was at once sad, severe and catastrophic facing the denial of some face the urgency of climate change. His speech comes timely since Paris is preparing and get ready to three months of COP21, under, the UN aegis. As such Ban Khi Moon has also addressed to French diplomats, during the week of French ambassadors, in Paris, answering the invitation of Laurent Fabius, French Minister of Foreign Affairs. Mr Fabius

Ban Khi Moon says in a press conference "there is no longer time to wait, but to act instead."

KERRY AND OBAMA THINK THAT CLIMATE CHANGE IS THE CHALLENGE OF THEIR GENERATION  
TO ACCELERATE EMISSIONS REDUCTION

Mr Fabius has also warned about the urgency to act and that he looks forward that the 196 countries present at the COP21, sign a historic agreement to reduce inter alia the reduction of greenhouse gas that causes the celsius 2 degrees above normal. The goal is to lower below 2 degrees that if they continue to rise would be catastrophic because removals of greenhouse gas will move into the pure atmosphere of centenarians or even millennia, according to Laurent Fabius. The French Minister of Foreign Affairs, is based on him even alarming scientific results. Ban Khi Moon and Laurent Fabius are granted on the fact that "We only have one planet to live and not another elsewhere." Laurent Fabius added there is non B Plan, and no B Planet" [?]. It is therefore a matter of survival, fro now on . President Obama just posted this Instagram photo from meeting a family in Alaska's Kenai Fjords National Park.
